Holland Bulbs

HOLLAND BULBS, as the earliest group of spring bloomers, are one of nature's most precious garden gifts. What would otherwise be a desolate and soggy garden period, becomes transformed and brightened with the fragrance and color of tulips, hyacinths, narcissi, crocuses and their kindred.

Whistler

Holland bulbs are useful and beautiful in the smallest garden and on the largest estate; indoors or outdoors; for forcing, bedding or naturalizing. Within the bulbs is stored all the future glory of leaves and flowers, requiring only the simplest culture to develop them to their highest perfection.

There is no dearth of color in this family; the wide range includes shades and combinations of blue, brown, yellow, white, orange, purple, red, pink, crimson, black and violet. Holland bulbs, as a class, are also the lowest priced hardy plants in existence, yet their beauty and utility are unsurpassed. No one who buys plants can afford to be without Holland bulbs.

VISIT WEISER PARK DURING TULIP-TIME

More than 10,000 Tulips, Hyacinths, Narcissi, etc., including at least fifty bulbs each of many choice and popular varieties, will be on display in our show grounds at Weiser Park during the next few weeks, according to weather conditions.

Our display gardens and nursery of 128 acres are located at Weiser Park, Pa., on the William Penn Highway (Pennsylvania Route No. 3) between Reading and Harrisburg. The gardens and the nursery are opened for inspection from 8 a.m. to 5 p.m. including Sundays.

If you wish to visit the garden during Tulip-time, Iris-time, or at any other season, fill in the card enclosed in this catalogue and mail it to us, so that bulletins showing the progress of the blooming season may be sent to you from time to time.

Tulips Make Gay Gardens

The great variety of dazzling Tulips, in every conceivable color combination, makes them the most popular of the spring-flowering bulbs. By planting bulbs of the different classes, a display of bloom may be had for several weeks, beginning first with the early-flowering section and ending with the Darwins and Breeders. Even a dozen bulbs will make a brilliant corner in the garden. The test of quality in Tulips is *solidity* rather than size of the bulbs. We import the best grown.

Darwin Tulips

Darwin Tulips are highly recommended for massing in shrubbery and for providing contrasting colors in the spring garden. Groups of twenty-five to fifty bulbs of one color produce striking and beautiful effects. In form, the cupped blooms are entirely distinct from all other classes of Tulips; they are unusually large and borne on long stems. Bulbs may be forced if brought to the heat not earlier than January. Garden bloom, May 15.

Six or more bulbs of one variety at the dozen rate; 25 or more at the 100 rate.
Not less than 6 of one kind sold

Breeder Tulips

Breeder Tulips are the unbroken forms of the old florists' Tulips. The blooms strongly resemble the Darwins, excepting that they have an entirely different range of color, comprising artistic tones of bronze, terra-cotta, orange, and brown. Breeder Tulips are May-flowering, producing blooms of enormous size, and because they are vigorous growers are valuable for the garden. We have taken great pains to select only the choicest varieties, and recommend all of them to anyone who wishes something especially fine. In height and blooming season they are practically identical with Darwins and can well be combined with them.

Cottage Tulips, continued

By recommendation of our Holland Growers, Warnaar & Co., the following comparatively new and proven varieties of Cottage Tulips are offered this year. Features, besides description given, include large blooms, strong stems, good forcing qualities, good bedding qualities, and superiority in general. Make your 1929 Bulb display "different" with these varieties.

	Doz.	100
Diamond. Old-rose, mauve tinged.....	\$0 90	\$7 00
Dulcinea. Orange-red.....	1 25	9 00
Mentor. Dark velvety brown; black base, yellow edges.....	1 25	9 00

White Hawk. 13 in. White.....	75	5 50
Superfine Mixture. From choice and distinct varieties of similar height and season. Top-size bulbs \$30 per 1,000..	50	3 25

Double Early Tulips

With few exceptions, Double Tulips should be used for forcing and bedding only. The flowers are very durable, and as they open slightly later than other Tulips, they prolong the flowering period. Stems 12 to 15 inches high. Bloom during late April and are remindful of peonies. Alternate rows of Single Early and Double Tulips are very effective.

Six or more of one variety at the dozen rate; 25 or more at the 100 rate. Not less than 6 of one kind sold

	Doz.	100

Hyacinths

Would you ask a fair maiden to dance, present her with a white Hyacinth, which asks charmingly: "Will you dance with me?" A purple Hyacinth will say for you: "I am sorry."

The old Greeks used Hyacinths for bridal wreaths and the bride's attendants wore crowns made of that flower. Strangely, the Hyacinth is also associated with death. The odor was once believed to be dangerous when inhaled in large quantities. The story runs that in France a murder was committed by filling the victim's bedroom with Hyacinths while he was sleeping.

The Hyacinth was named after a Laconian youth, Hyacinthus, to whom Apollo, the god of music, was very devoted. One day the two friends were throwing quoits. Suddenly a discus which Apollo had pitched with great force swerved and struck Hyacinthus on the forehead, killing him instantly. Apollo was heartbroken and wept bitterly. "Oh, that I could die for you," he exclaimed, "but since that cannot be, my lyre shall keep your memory alive." When he had ended, a lovely flower with delicate purple bells had sprung up where Hyacinthus' blood had spotted the ground.

"If thou hast but two loaves of bread, sell one of them, and buy white Hyacinths to feed thy soul."

Culture is similar to other bulbs. Plant 6 inches apart and cover with 4 inches of soil. Setting the bulbs on a layer of sand improves the bloom. They are best in beds and other formal arrangements. A most popular indoor plant; anyone can handle them. Unexcelled for fragrance.

We specialize in the best grade Hyacinths. The stock for 1928 is of 18-19 centimeter circumference, second in size only to the very largest bulbs obtainable. *If the blooms produced are not of the largest you have ever seen, your money will be refunded.*

All named Hyacinths, 30 cts. each, \$3.50 per doz., \$25 per 100

Single Red and Rose

General De Wet. Large; soft pink.
Queen of the Pinks. Bright rosy pink.
Roi des Belges. Dark red.

MAMMOTH FLOWERS FROM FARR BULBS

Last fall I had a large number of bulbs from you which proved most satisfactory. In spring my garden was ablaze with the most wonderful tulips. They were the largest that I have ever seen grown outdoors. They even received mention in a local newspaper, and I had many inquiries as to where I had bought them.—MRS. WALTER B. RILEY, Champaign, Ill.

Daffodils and Narcissi

One can never have too many Daffodils. Where space is limited plant in the border, where there is a stretch of meadow or orchard land, they can be naturalized in quantity. Varieties for quantity planting such as this can be purchased quite reasonably.

All the *Narcissus* bulbs we offer this year are Double-Nose Mother Bulbs

Miscellaneous Bulbs

(FOR THE DISTINCTIVE AND UNUSUAL)

The Federal Quarantine has been temporarily lifted on a number of old-time favorites for the spring bulb-garden. The most desirable varieties are here included.

CHIONODOXA (Glory-of-the-Snow). An almost necessary companion to the Crocuses and snowdrops. Easily naturalized and comes up each year. Dark blue flowers with white eye. 6 to 10 blooms on a stem 4 to 6 inches high. Splendid for borders and rockeries. 50 cts. per doz., \$2 per 100, \$18 per 1,000.

LILIUM candidum (Madonna Lily). Very fragrant, pure white, trumpet-shaped flowers, 3½ to 5 inches long, borne horizontally, 6 to 25 in a head, on tall, erect, leafy stems 3 to 4 feet high, during late June and July. 50 cts. each; 5 or more at 45 cts. each; 25 or more at 35 cts. each.

LILIUM regale (*L. myriophyllum*). A magnificent Lily from western China, with very large, trumpet-shaped flowers of waxy white, shaded pink, tinged with canary-yellow at the base of the petals. Height 4 to 5 ft. Blooming-size bulbs, 85 cts. each; 5 or more at 65 cts. each; 25 at 55 cts. each.

LILY-OF-THE-VALLEY (*Convallaria majalis*). Strong clumps, 5 or more at 30c. each; 25 or more at 25c. each. Not less than 5 sold.

MUSCARI botryoides, Heavenly Blue. Dainty sky-blue flowers. Lovely in masses. 50c. per doz., \$2 per 100, \$18 per 1,000.

SCILLA sibirica. Pretty sprays of rich blue flowers. Suitable for naturalizing or indoor forcing. Culture the same as crocuses. 65 cts. per doz., \$4.50 per 100, \$40 per 1,000.

SNOWDROPS, Single. The very first spring bloomers. Should be planted liberally. Large, white blooms. 50 cts. per doz., \$2.50 per 100, \$22 per 1,000.

SNOWDROPS, Double. Large, double, white blooms. 65 cts. per doz., \$4 per 100, \$35 per 1,000.

Crocuses

When the spring sun begins to warm the ground, the Crocuses quickly respond to the bright rays. Following the snowdrops, they are among the very earliest spring flowers, and are most effective when dotting the lawn without any fixed plan of arrangement. The bulbs can be strewn thickly over the surface and be set where they fall, merely lifting the sod with a knife or trowel, slipping the bulbs underneath and pressing the sod back into place.

King of the Whites. Snowy white; large blooms. 60 cts. per doz., \$3 per 100, \$25 per 1,000.

Mammoth Yellow. Especially desirable for lawn planting. 65c. per doz., \$4 per 100, \$36 per 1,000.

Maximilian. New. Poreelain-blue. 60 cts. per doz., \$3 per 100, \$25 per 1,000.

Purpurea Grandiflora. Dark purple. 60 cts. per doz., \$3 per 100, \$25 per 1,000.

Mixed Crocuses. All colors mixed, Top size. 40 cts. per doz., \$1.75 per 100, \$15 per 1,000.

Not less than 6 bulbs of any variety supplied.

Instructions and Terms for Ordering

On all orders for Holland bulbs mailed to us before July 1, 1928, a discount of 10 per cent is allowed. An additional 2 per cent will be allowed on orders accompanied by cash.

Quantity Rates. Unless otherwise specified, less than 6 bulbs of one variety will not be supplied. The dozen rate is applicable on 6 or more bulbs of one variety; the 100 rate on 25 or more bulbs of one variety.

Prices are f. o. b. our Station. Shipments are best made by express. If parcel post is necessary, charges are billed at actual postage, plus 8 cts. to partly cover special packing details and service involved.

Terms. Cash with order, excepting to previous customers who have established credit and who order in excess of \$10. Orders for less than \$10 must be accompanied by cash in all cases.

The Iris walk at "Willowmere," Roslyn, L. I., bordering the famous Rose-Garden. Here the Iris Germanica seems to be at home in half-shade, despite the fact that they are considered sun-lovers

MORE and more Irises are being sold in ten and hundred lots. Garden-lovers are just beginning to appreciate the beauty and effect of Irises in mass, for bedding, borders, rock-gardens, pools, designs, walks, etc. The range of color, profuse bloom, low price, and the absolute hardiness of Irises, which causes them to flourish where other plants fail, leave little excuse for unsightliness or monotony in any garden. Special quantity prices, as applied on this list, encourage mass planting.

Irises are appropriate and will thrive in almost any location. Groups and masses of one variety are the best from a landscape point of view. Wonderful effects may be obtained by planting generous masses along walks, drives, shrub-borders, streams, pools, and in rock-gardens. A mixture of varieties is seldom pleasing—

This list includes only first-class, standard varieties. More than 400 lesser varieties have been discarded during the last few years. You can order according to color preference, with conviction that the variety is first class and good.

50 or more roots of one variety at 15 cts. each
25 or more roots of one variety at 16 cts. each

PRINCIPLES OF IRIS PLANTING

1. Plant Bulbous Iris in a sunny, well-drained, lime soil location.
2. Plant so that upper third of bulb is exposed to air.
3. Plant Fibrous Iris in moist, acid soil.
4. Plant even with crown where foliage turns green.
5. Plant masses, avoiding sharp contrasts.

SPECIAL COLLECTION OF 37 VARIETIES; One plant each for \$12.50, two plants each for \$20, five plants each for \$40

SEND FOR COMPLETE LIST. If you are interested in Irises from a collector's viewpoint, send for our 1928 Price List which offers the complete assortment of varieties found in the Farr Collection

SINGLE EARLY TULIP, KEIZERKROON
A showy bedding variety which should be used in large quantities. It grows about 16 inches tall. \$1.10 per doz., \$8 per 100.

Flowering Crab-Apples

GAY TREES whose color dominates our garden in springtime bring the gorgeousness of the Orient to America. The Chinese Flowering Crab-apple is entirely hardy, thriving in the cold of Canada and under the warm sun of the southern States. Dr. E. H. Wilson calls it the "Queen of the Garden" and pronounces it decidedly more gorgeous than the Japanese cherries.

Malus atrosanguinea is the best of the many varieties. The color of flowers and form of tree are well shown in the picture. We offer 4 to 5-foot specimens, which have been trained, trimmed, sprayed, and transplanted frequently, at **\$3.50 each**, 5 or more at \$3 each, 25 or more at \$2.75 each, f.o.b. our station.

Shipment will be made in fall as soon as frost makes the trees dormant. We ship at our risk, and the trees are returnable if they are not satisfactory in every respect.
